ASIA SMART FARMING & FOOD SECURITY 2023

MAKING FARMING ATTRACTIVE AGAIN

3-5 OCT 2023
MITEC, KUALA LUMPUR

ABOUT THE EVENT

Asia Smart Farming & Food Security 2023 (ASF 2023) focuses strategically on pesticide-free smart farming through knowledge-sharing and skills development for farmers and technology sharing from world-renowned agrotech companies to address the challenges that farmers face such as:

- limited access to technologies
- lack of proper training and education
- knowledge gap on high-yield seeds
- difficulty in getting financial assistance
- heavy dependence on chemical pesticides
- limited access to market
- inefficient logistic facilities for perishables and others

The tagline for this event is "Making Farming Attractive Again". The event provides visitors with access to proven smart farming technologies to produce higher quality products that command better prices and higher income for farmers.

These include artificial intelligence, sensors, drones, data analytics, automation and ESG-compliant consumables.

ASF 2023 provides a professional agriculture conference and exhibition platform that brings together local and international experts, innovators, policy-makers, financiers and other stakeholders in smart farming technologies. The opportunities presented during this unique conference, exhibition and B2B matching session expose farmers to sustainable business opportunities.

Participants of ASF 2023 will highlight new business ventures and share their knowledge and experience while providing hands-on opportunities to local agropreneurs to participate in the lucrative domestic agriculture sector from upstream to downstream activities, including the food processing industries.

ASF EVENTS

A. SMART FARMING EXHIBITION

- Showcasing the best practices in agriculture across the world.
- Promoting the adoption of pesticide-free smart farming technology for the agriculture sector to address food security.
- Facilitating business matching and agriculture technology adoption between technology providers and farmers (seed-to-market solutions).

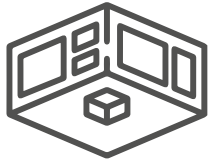

B. NoSelf AND (As Nature Does) CONFERENCE

- Sharing scientific knowledge and background of the breakthrough findings of the inhibitory effect of extra-cellular DNA (Self-DNA).
- Promoting awareness of the Self-DNA principles and presenting a sustainable path forward in agriculture.
- Providing a platform to accelerate the implementation and use of Self-DNA technology in agriculture.

WHY PARTICIPATE?

- Malaysia is promoting agriculture as a main economic driver and it is time to grab the opportunity.
- ASF unleashes sustainable solutions for higher quality crops and higher yields, thus increasing farmer income, and addressing food safety, social issues and environmental protection.
- The event is making pesticide-free smart farming possible and accessible to commercial and small-scale farmers through skills development, technology showcases, and the sharing of valuable knowledge directly from specialists and industry players.
- Food security has become a national interest and the ASF is enabling possible solutions through proven pesticide-free smart farming, in collaboration with global leading pioneers in their respective technologies.
- The event serves as a platform to bridge the gap between industry players by providing a meeting-place for business players, manufacturers, researchers, experts to enable business opportunities.
